

Area of Innovation of application

1. Sector: ICT and/ or Digital technologies

ICT –sectors	Description
<input type="checkbox"/> Software Publishing	Involves in producing and distributing computer software, such as designing, providing documentation, assisting in installation, and providing support services to customers
<input type="checkbox"/> Telecommunications	Wired/wireless operators, satellite companies, cable companies and internet service providers VISP
<input type="checkbox"/> Web applications	Data processing, hosting and related activities
<input type="checkbox"/> Innovative advanced electronics systems Maintenance and e-waste management	Repair of computers and communication equipment Component Producers
<input type="checkbox"/> Others	Specify: _____

2. ICT enabled - Start-ups and SMEs [can tap on the great potential of expansion in communication facilities by developing products and services targeting market platforms.] These include:

- On demand/sharing economy Matching Platforms
- E-commerce/ digital payments/ Courier / Delivery
- Others Specify-----

3. Emerging ICT related- Start-ups and SMEs

Unmanned systems [The autonomous unmanned system technologies combined with emerging Information and Communication Technology (ICT) applications and services to monitor diverse kinds of environments application for Agriculture, health,...]

AI [that enhances the accessibility of Information and Communication Technologies (ICTs); location based services; data management and analysis platform; localization (AI based) and localized services; Image processing; AI in agriculture and health]

4. Enabling businesses for ICT and related areas startups

Incubators/ Hubs/studios/ accelerators

Others Specify-----

1

¹ Innovation: can emanate from R&D (science and technology) or business or market [innovation to come up with new problem—creating new market which require no or little (basic) technical- engineering, science expertise]. It can be incremental or transformational (radical- new solutions – new market: problem matching) within a given context. All in all, whatever the source or basis of innovation or the degree of novelty, it is about bringing new ideas to impact (socio-economic).
